

MORE THAN 200 VISITORS ATTEND AGILOX OPEN HOUSE EVENT

- **Three-day event series hosted by technology leader AGILOX attracts visitors from across Europe to Austria**
- **AGILOX Automation Day on September 21, 2023, brings together industry experts to discuss trends and developments in intralogistics**
- **AGILOX Partner Days invite international premium partners to the AGILOX headquarters for the introduction of new product innovations and engaging discussions**

(Neukirchen bei Lambach, October 02, 2023) As part of the AGILOX Automation and Partner Days, the Austrian technology leader extended invitations to customers and partners, laying another foundation for successful collaboration.

Recently, more than 200 logistics experts from across Europe gathered at the AGILOX headquarters in Neukirchen bei Lambach to discuss industry trends and product innovations in the world of Autonomous Mobile Robots. The visitors were welcomed by the company's co-founders, David Niedermaier (Chief Technology Officer) and Josef Baumann-Rott (Chief Operating Officer), as well as Jürgen Baumgartner (Chief Sales Officer). *"Pushing technological boundaries and always striving for the best and safest solutions for our customers are in our DNA,"* said David Niedermaier (Chief Technology Officer and Co-founder of AGILOX). The technology company was recently honored with the prestigious IFOY Award for the best AGV/AMR.

Wolfgang Fasching, a three-time winner of the "Race Across America" and a successful mountaineer who conquered Mount Everest, followed with his keynote session "Pushing Boundaries," explaining what it means to think outside the box to achieve extraordinary results.

Subsequently, visitors had the opportunity to witness the performance of fully autonomous robots through live demonstrations. With devices like the ONE, the ODM, and the OCF, AGILOX covers 80% of all transport applications in production and warehouse logistics.

"The AGILOX Automation Day was a tremendous success. Since 2017, we have been pioneers in the AMR field, automating transport processes. With over 1,200 devices in the field and more than 150 customers worldwide, AGILOX is one of the leading providers of Autonomous Mobile Robots.

"This makes us very proud," said Josef Baumann-Rott (Chief Operating Officer and Co-founder of AGILOX).

In addition to the AGILOX Automation Day, the AGILOX Partner Days took place in advance. Exclusive distribution partners gained insights into the latest product developments and discussed industry developments and trends.

A highlight of the event was the presentation of the AGILOX Partner Awards. The award for the best project of 2023 was awarded to CLS S.p.A. for a project in the grocery segment in Spain. The highly complex project received recognition for its intelligent solution design based on 14 Autonomous Mobile Robots. Laszlo Szentmiklossy from ALEF Distribution HU Kft also received the

"Special Recognition Award for Excellence 2023." This award recognizes outstanding performance and exceptional contributions to the partnership with AGILOX.

Daniel Zindl, Chief Product Officer of AGILOX, shed light on current market trends and provided insights into the future of intralogistics in his presentation "Market Trends & Outlook." Wolfgang Pointner, R&D Coordinator at AGILOX, took guests on an exciting journey into the world of innovation and progress with his presentation "Innovating the Future." He highlighted the role artificial intelligence will play in the future of intralogistics and how simulation-based robot development will further strengthen AGILOX's innovation capabilities. A compelling case study by Matteo Falchi illuminated the exceptional partnership between CLS and AGILOX, serving as an inspiration for other AGILOX partners.

AGILOX continues to emphasize close collaboration with its distribution partners to develop innovative intralogistics solutions and successfully implement them worldwide. The Partner Days once again demonstrated that these partnerships are invaluable and hold a promising future for the intralogistics industry.

The AGILOX PARTNER DAYS & AUTOMATION DAY were three exciting and innovative days filled with entertainment, knowledge, and inspiring discussions.

About AGILOX Services GmbH

AGILOX Services GmbH is an international leading manufacturer of autonomous mobile robots (AMRs) for all intralogistics transport processes in warehouse and production logistics. With more than 1,200 AMRs in the field and global customers such as Siemens, BMW, Bosch & Daimler, AGILOX is one of the leading full-service providers for small and large fleets of driverless transport systems. AGILOX Services GmbH, headquartered in Neukirchen bei Lambach, Austria, has branches in Europe, the USA, and China, employing more than 200 employees worldwide.
